Famous For:

Max 171 score in the IQ test OASIS and then downhill.

Playing pool at home with masks on.

Tweaking my audio system with crystals.

Eating 1 liter banana ice cream every day.

Walking outside without a jacket in the winter.

Organisations/Memberships:

Synaptiq Society, The Glia Society.

Why work with IQ:

In the first IQ test I took I spent only a couple hours and got everything correct. I didn't think it was that special until I found myself sliding downhill and getting lower and lower scores with every test I took. After I reached the bottom fully beaten down and humiliated I took on another approach...instead of trying to beat my score I started to enjoy the IQ tests instead. Right now I spend 1000 hours on every test and it's a lot more fun than playing a computer game. The IQ tests also prevent me from becoming delusional and seeing things that aren't real in daily life. After every score report I get a confirmation that the answers I found were real and not imagined. It helps me become a more logical and truthful person.

Statement for the World:

Everyone can improve themselves and follow their passion no matter how old they are. Never give up and always have fun.
