Sung-Jin Kim, World Genius Directory: 2017 Genius of the Year - Asia

<http://www.facebook.com/sung.jin.kim.1978> • <http://blog.naver.com/leaffan> • <http://www.ibrea.org>

Famous For:

Being humble! I am an introvert personality and almost always read books or think constantly about something except working time. I am studying the learning method and the brain training method individually by myself. I have had a variety of occupations, such as an inventory inspector, hospital administration staff, a hairdresser, and now I work as an electrical safety manager. I have more than ten certifications, including national technical certifications, but use my spare time to develop high range IQ tests and online culture.

Organisations/Memberships:

Forty different High IQ Societies including The World Genius Directory, Mensa, Glia Society, ISI-Society, ELITE High IQ Society.

Occupation/Professional Goals:

I am working as an electrical safety manager. My occupational goal is to become an electrical safety manager, integrating not only the electrical field but also every industrial field. As a part of the plan, I continue to study for various industrial fields and to research to synchronize the safety methods from various fields.

Why work with IQ:

I have always pondered difficult questions since I was young, such as what the factors are in deciding a particular behavior of a person and what relationship it has on the intelligence development. This led me to questions and interest regarding IQ of how much the human IQ can be developed through nurture. Over the past six years, I have been working on the individual research related to the learning method and brain-training, and I will continue to work on it. Soon, the result of my research will be revealed through the so-called 'talent donation'.

Goal for IQ as a WGD Ambassador Genius of the Year:

First, I thank all of the members of World Genius Directory who made me the winner of the World Genius Directory 2017 Genius of the Year (Asia), by believing-in, and supporting, me. I am well aware of that every one of you is carrying out your responsibilities at your home and at your work. It is a great honor, and also a great responsibility, for me to introduce us and the WGD to the world. I believe that we must help people to have the correct perception and understanding of those with high intelligence and overcome the prejudice and misunderstanding. I also believe that it corresponds to the object of the establishment of WGD. Therefore, I will give the correct impression of IQ to others, and interact deeply with those with high intelligence all around Asia by introducing WGD.

Statement for the World:

Always live "a hardworking life". Those who say that trying is not enough should realize that it is that they have not tried enough. A true effort makes you a truly valuable person. Also, the value has the beneficial influence to the lives of your family, yourself, friends, co-workers and your neighbors. I am confident that this is the key to the happiness of you, me and all of us. It's never too late to start living a hardworking life. Let's try our best to live a happy life.
