Occupation/Professional Goals:

I am employed as a Head of Pre-Construction and Construction of Generating Facilities and Project Manager of WF Mesihovina (the first wind farm in Bosnia and Herzegovina) in public utility Elektroprivreda of the Croatian Community of Herzeg-Bosnia in Mostar. Mainly, my professional focus is project management in pre-construction and construction of generating facilities oriented towards renewable energy sources. I'm a PhD candidate at the Faculty of Geodesy, University of Zagreb, with a publicly defended and approved theme of the PhD Thesis "Space-Time Modelling of Displacements and Deformations of Hydro Power Plants". I lead and am a member of numerous expert teams engaged in preparation of developing studies and strategic documents from the field of energetics. I have been participated in the preparation of over 50 studies and elaborates from the field of energetics. I have authored 34 scientific and professional papers and held 39 lectures and presentations in B&H and abroad. My professional goals are lifelong learning and building a sustainable society based on renewable energy sources.

Why work with IQ:

I wanted, and still want, to meet kind and compassionate people who perceive the world in wider perspectives, without prejudice; people who see this complex world in a very simple way. I felt and I feel the need to test all my possibilities, find my own potentials and limitations, advantages and disadvantages, to find something new about myself. I discovered something.

Goal for IQ as a WGD Ambassador Genius of the Year:

To promote the World Genius Directory and the other high IQ organisations and societies in the outside world.
To work on developing a responsible, tolerant, conciliatory and inclusive - not exclusive - society.

Statement for the World:

Be humble, not arrogant. Be modest, but rich in spirit. Live a life worth living, with dignity and devotion, for the higher goals and better future for this and the next generations. If and when there seemed to be no hope at all, have your goals and move forward. Believe in yourself, be inspired by others, never give up.
