Naoki Kouda, World Genius Directory: 2018 Genius of the Year - Asia

facebook.com/naoki.kouda.50 • kanji-love.wixsite.com/high-range-iq-test/author • kanji-love@hotmail.co.jp

Famous For:

Passing the top grade for the Japan Kanji Aptitude Testing and working at the Japan Kanji Aptitude Testing Foundation.
Scoring supervised IQ tests, scoring planning and scoring system development using AI-deep learning.
World record holder of the high range IQ test Triplex.
President of the METIQ, SATORI and ZEN high range IQ societies.
Creator of the SAM Light, NINJA, GAIA and MACH-2 high range IQ tests.
Production of "KAIS" what a test for research purposes.

Organisations/Memberships:

World Genius Directory, Mensa Japan, Metiq, Satori, Triple-4, Zen, Global Genius Generation Group, ISI-Society.

Occupation/Professional Goals:

Working at the Japan Kanji Aptitude Testing Foundation, developing AI that cooperates with universities to perform scoring and analysis of hand writing kanji characters. I am also creating manga and some videos personally, and I'd like to run a high range IQ test as logical art. I will continue to make something and continue to enjoy people. For those who live in the same era, for those who will live after we return to the soil.

Why work with IQ:

I was only talking about a strange thing and the dweller of my own dreams since I was a child. Always I thought that I would like to have fun talking with people who are in a same direction of interest. And then I took the entrance exam of Mensa. I do not know how many people I have met in my life, but only a few people were very fun to talk with. Now I consider that I would like to meet as many interesting people as I can. I took high range IQ tests as one of tool to know myself. I feel that it's fun to challenge the functional limit of the brain in a straight line.

Statement for the World:

I want to leave behind a number of art pieces of my life. I think that it is my personal goal and the proof of 'humanity is a living thing'. I feel mankind is a superorganism. Currently, I am producing high-rank IQ tests which is logical art. I also plan to continue making artworks, movies and animation as art and translate my philosophical art which is presented in Japanese.
I am entertaining everyone in the world, as I want to entertain the world.
Arigatou-gozaimasu.
