

The x High Range IQ Test by Dr Jason Betts

See the Score and Norming Data File at www.psiq.org/lux for the submission instructions and guidelines. All answers are either any single mark or symbol, any single Latin or Greek letter, or any Arabic number. Answers are only used once and are exactly defined and case sensitive. A 1-word explanation is allowed. Copy these questions into a text email and add your answers. Internet research is highly recommended. This is an experimental test and may not measure IQ at all. The first 30 submissions are only \$11 AUD.
